

ISO 20 toolholders

Applications The REGO-FIX ISO 20 toolholders are designed to work with the HAAS Office Mill. To utilize the full potential of your machine, use the REGO-FIX brand of holders and collets to see the difference quality can achieve in your machining operations.

Balancing

// 100% balanced to 50,000 rpm.

Matched tooling system for best fit For highest precision and best results the whole system counts. Therefore REGO-FIX components are carefully matched for optimum fit and accuracy. This guarantees the best runout and balance.

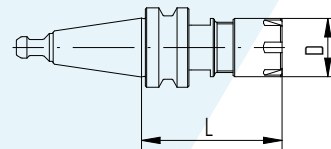

For the influence of runout on tool life see the graph on page 270.

Accessories are not included in delivery.

Expert advice

We recommend tightening the clamping nuts with our torque wrench.

For tightening torque recommendations, please refer to page 293.

ISO / ERM HAAS

Type	Part no.	Dimensions [mm]		Accessory
		D	L	Wrench
ISO 20				
ISO 20/ERM 11 x 048 HAAS	2420.11116	16	48	E 11 M
ISO 20/ERM 16 x 053 HAAS	2420.11616	22	53	E 16 M
